

Assisted Intervention Matching Tool (AIM)
Version 1.0.001

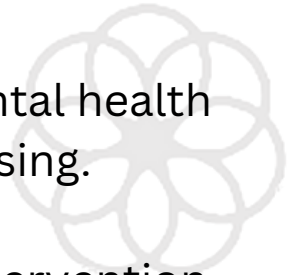

[Get Started](#)

New resource to help identify the best in-home treatment to meet youth/family needs.

Finding the best program to meet a youth's mental health and/or substance use needs can be confusing.

If in-home services are needed, the Assisted Intervention Matching Tool (AIM) may help you to identify the best match.

The AIM Tool uses a series of questions to help you to find the best-matched in-home services for a youth/family's needs.
